

ABDULRAHMAN MUDHER

Frontend Developer (React / TypeScript) | MSc Computer Engineering – NLP & AI
Sakarya, Türkiye | +90 553 680 3564 | abdodj18@gmail.com | [LinkedIn](#) | [GitHub](#) | [mudher.com](#)

PROFESSIONAL SUMMARY

Results-driven Frontend Developer with 3+ years of experience building performant, accessible web applications using React, TypeScript, and Next.js. Currently completing an MSc in Computer Engineering with a research focus on NLP and deep learning. Proven ability to deliver end-to-end features — from responsive UI design to AI-powered data pipelines — with a security-aware engineering mindset. Strong track record of translating complex requirements into clean, maintainable code that passes code reviews and ships on time.

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), Redux, Tailwind CSS, Bootstrap, HTML5, CSS3

Backend & Databases: ASP.NET Core (C#), SQL Server, Firebase, REST APIs

AI / ML & NLP: Python, TensorFlow, PyTorch, Pandas, NumPy, NLTK, Scikit-learn, LSTM, Sentiment Analysis

DevOps & Tools: Git, GitHub, VS Code, Google Workspace, Microsoft Office 365

Cybersecurity: Networking fundamentals, Linux CLI, Security best practices, OWASP awareness

PROFESSIONAL EXPERIENCE

AI Data Annotator | TELUS International – Project SONIC

Sep 2025 – Nov 2025

- Reviewed and annotated digital content for AI model training using detailed written guidelines, consistently achieving accuracy targets above the team benchmark.
- Identified and resolved edge-case labeling decisions, reducing annotation ambiguity and improving dataset quality for downstream model performance.
- Operated in a fully remote, asynchronous environment, meeting daily productivity quotas without supervision.

Software Developer | Self-Employed

May 2024 – Aug 2024

- Designed and delivered a Patient Information Management System using Python and Tkinter, reducing manual record-retrieval time by an estimated 60%.
- Engineered a relational database schema for efficient patient record storage and retrieval, with integrated file-scanning and automated storage workflows.
- Implemented an advanced search module with multi-field filtering, improving retrieval speed and accuracy across 1,000+ patient records.

IT Specialist | Proprint Solutions

May 2022 – Oct 2023

- Provided Level 1/2 IT support and system maintenance for a 30+ workstation environment, resolving hardware and software issues with an average turnaround under 2 hours.
- Diagnosed and eliminated recurring technical faults, contributing to measurable reductions in unplanned downtime.
- Maintained documentation for system configurations and incident logs, supporting continuity during staff transitions.

Software Engineer Intern | Nanodems Yazılım Teknolojileri

Jun 2022 – Aug 2022

- Integrated third-party software and firmware for remote device management via NDIS protocol, expanding system compatibility with new hardware vendors.

- Assisted senior engineers in debugging and performance-optimising a surveillance system application, reducing crash frequency by participating in root-cause analysis sessions.

Web Designer | Proprint Solutions

Nov 2021 – Feb 2022

- Designed and developed a fully responsive company website from scratch using HTML5, CSS3, and vanilla JavaScript, enhancing the company's digital presence.
- Improved mobile accessibility and page-load performance through semantic markup and optimized asset delivery.

KEY PROJECTS

Earthquake Sentiment & Urgency Classifier | Python · NLP · LSTM · TensorFlow

2024

- Analyzed 500,000+ real-time tweets collected during the 2023 Turkey earthquake to classify sentiment and urgency for disaster-response prioritization.
- Addressed severe class imbalance using SMOTE and custom loss weighting; trained and evaluated LSTM models, producing full error-analysis and reporting documentation.
- Achieved macro-F1 improvements of 15% over the baseline by iterating on preprocessing pipelines and hyperparameter tuning.

Hospital Website Interface | ASP.NET Core · React.js · Bootstrap

2024

- Architected a multi-page, fully responsive hospital website with integrated ASP.NET Core backend services for appointment forms and data processing.
- Implemented reusable React component library reducing UI development time for new pages by approximately 40%.

Givingly – Crowdfunding Platform | Next.js · Tailwind CSS · Firebase · Redux

2023

- Built a full-stack crowdfunding platform with Firebase authentication, real-time campaign updates, and Redux state management for dynamic campaign CRUD operations.
- Achieved Lighthouse performance scores above 90 through code-splitting and lazy-loading strategies.

EDUCATION

MSc, Computer Engineering | Sakarya University

Expected Jan 2026

Research Focus: Natural Language Processing (NLP) & Deep Learning

BSc, Computer Engineering | Sakarya University

Aug 2022

Frontend Development Bootcamp | Re:Coded

Sep 2023

Full-stack frontend track covering React, TypeScript, and modern JavaScript ecosystems

CERTIFICATIONS

-
- FreeCodeCamp — Responsive Web Design; JavaScript Algorithms & Data Structures
 - HackerRank — JavaScript (Basic & Intermediate), REST API (Intermediate), React (Basic)
 - Turkcell Geleceği Yazarlar — Data Science & AI, React 201, Big Data
 - Coderspace — Cybersecurity Training

LANGUAGES

Arabic (Native) | English (Fluent – C1) | Turkish (Advanced – B2/C1)
